13:40-13:50 – wrap – up (Polish National Coordinator)

Policy Area Hazards works for the prevention of pollution and the reduction of use of hazardous substances as well as for mitigation and remediation of historic pollution in the Baltic Sea environment.

Policy Area Safe provides a sound platform for reinforcing maritime safety and security in the Baltic Sea region.

Policy Area Secure offers a platform for cross-border, cross-sectoral and multi-level cooperation to strengthen societal security and allows for better coordination of activities dealing with prevention and preparedness related to natural and man-made threats and developing methods for responding to security risks posed by climate change.
